

Innovo Cloud Migration & Deployment

Bridging the Gap between Business Demand and IT Capacity

Innovo delivers easy-to-adopt and time-effective migration solutions to a broad spectrum of customers. We combine practical experience with technology & business strategy to help you embark on a smooth cloud migration journey

What we offer:

Strategy and Assessment - We offer cloud migration strategies that will help you define your digital journey. Our service involves workloads' assessment to identify cloud-readiness for application migration. The tested & proven methodology is customised to enhance business outcomes and overall results

Cloud Migration - Our cloud migration approach will facilitate the transition of your application workloads to a new, effective operating model. We offer solutions that ease the process of application migration and modernisation, enable building new cloud-native applications, and transform your infrastructure.

Governance - Post-migration of workloads to the cloud, we ensure that you are able to maximise value through cloud investments. We offer a set of services that facilitate managing your cloud environment. Our cloud governance frameworks are unique to your business value creation, benefits, and resource optimisation.
